VISPERA

From the first step of the infinite ladder of the music industry VISPERA knew it would be extremely difficult to climb up. Since the beginning in 2010, Vispera never had the illusion that it would be easy or that an "American Idol" or "The Voice" would give them instant fame and recognition. Alfredo (vocals), Jose (bass) and Robert (lead guitar and backing vocals) as the original members decided to break the chains that rule the world of the Spanish rock scene that is clinging to the past. Unfortunately, these challenges usually come with very predictable and disappointing results such as the succumbing of "Curanderos" and the agonizing of "Maria Fatal". Local bands who deserved much more than what the public returned to them in exchange for their music. Milo (drums) and Luis (rhythm guitar and backing vocals) Joined Vispera's frontline, musicians with the same mission, passion and professionalism that makes Vispera one of the most innovating and promising bands of the L.A. Spanish rock scene.
